MANUFACTURERS OF

Column and Pilaster Capitals

FOR

INTERIOR AND EXTERIOR USE

IN presenting this catalogue to the trade, we aim to show some of the styles of capitals made of the proportions called for by the principal orders of architecture, that we carry in stock for immediate shipment.

In addition to the styles shown, we have a large number of models of conventional and of special design, which we intend to illustrate in a subsequent issue.

We will be pleased to quote prices promptly on special work of this character on receipt of detail drawing or tracing of same. We are prepared to make prompt shipment from stock of the sizes most frequently called for. Orders for caps of unusual size will be filled with the greatest dispatch consistent with good workmanship.

We do not think it necessary to enter into a detailed description of the material used or the method of manufacture, as goods of this character are now so well known to the trade; our stock will be found to be well modeled and clear cut and of correct architectural design. Capitals for exterior use are made of special composition to resist the deteriorating influence of the weather. Our wood and composition caps can be stained to match any wood finish.

Caps for exterior should always be flashed on top with lead. **Send for prices.**

TERMS.

1. We make no charge for boxing or cartage.
2. As we pack goods with the greatest care, we are not responsible for breakage or loss in transit, our B/L being guarantee of good order when shipped, also that number of packages called for were forwarded. All shortage should be noted on freight bill and any damage or breakage noted by agent on the same, before payment is made. We will help customers sustain damage claims if fully informed as to the loss.
3. In the absence of the usual commercial rating, send us check or satisfactory references with your first order, else the order may have to wait until we determine what credit your financial standing entitles you to.
4. Net cash 30 days or 2 per cent. discount if settlement is made 10 days from date of invoice. Where prices are made delivered freight charges are first to be deducted.

INSTRUCTIONS FOR ORDERING.

In ordering capitals give number and size required and state whether for EXTERIOR or INTERIOR use.

Diameter of column should be taken where shown on figure A for Corinthian capitals and on figure B or C, whichever way neck of shaft is turned for other capitals shown in catalogue.

Wood dowel. Dotted lines indicate wood dowel or core which is to be used to carry the weight imposed on column. This should be made about ⅛ in. longer than height of capitals. For capitals with 5 in to 11 in. diameter neck, make dowel 1¼ in. smaller in diameter; 12 in. to 16 in. capitals 1½ in. smaller, and for 17 in. to 24 in. capitals 1¾ in , 24 in. to 30 in 2¼ in

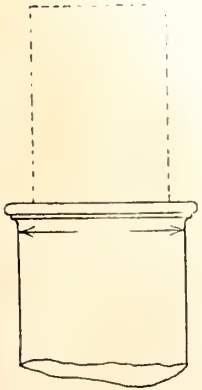

Fig. A.

Pilaster capitals Unless otherwise specified, pilaster capitals will be furnished with same shaft measurement as column capitals and returning one-half.

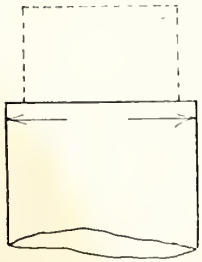

Fig B.

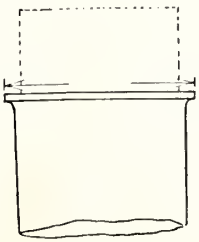

Fig C.

Cove moulding. All capitals are furnished **without** cove moulding
